## PROFESSIONAL SUMMARY

Full-stack engineer turned manager with 8 years of experience. Scaled engineering team from 5 to 25 at Mercari. Expert in Go and distributed systems.

## TECHNICAL SKILLS

**Languages:** Go, Python, Java, TypeScript, Rust

**Frameworks:** Gin, FastAPI, Spring Boot, Next.js, gRPC

**Databases:** MySQL, Spanner, Redis, BigQuery

**Cloud:** GCP, AWS

**Tools:** Docker, Kubernetes, ArgoCD, Prometheus, Terraform

## PROFESSIONAL EXPERIENCE

### Engineering Manager

2021-01 - present

Mercari

Managing backend platform team of 12. Led migration from monolith to microservices reducing deployment time by 80%.

Technologies: Go, TypeScript, Kubernetes, GCP, Spanner, Pub/Sub

### Senior Backend Engineer

2018-06 - 2020-12

LINE

Built messaging infrastructure handling 100B+ messages/month. Implemented message queue system with zero message loss.

Technologies: Go, Python, Kafka, Redis, MySQL, Docker

### Backend Engineer

2016-04 - 2018-05

Rakuten

Developed e-commerce search and recommendation APIs serving 50M+ users.

Technologies: Java, Spring Boot, MySQL, Elasticsearch, AWS

## PROJECTS

### GoMQ (open-source)

2022-04 - 2022-12 · 9 months · [GitHub](#)

Lightweight message queue written in Go. 3k GitHub stars, adopted by several startups.

Technologies: Go, gRPC, etcd, Prometheus

### K8s Cost Optimizer (personal)

2023-02 - 2023-05 · 4 months · [GitHub](#)

Tool for optimizing Kubernetes resource allocation and reducing cloud costs.

Technologies: Go, Kubernetes, Prometheus, Grafana

## EDUCATION

---

### **Masters in Information Technology**

Tokyo University, 2016 | GPA: 3.7

## CERTIFICATIONS

---

GCP Professional Cloud  
Architect

Certified Kubernetes  
Administrator
