## PROFESSIONAL SUMMARY

QA Automation Engineer with nearly 3 years of experience in web application testing using Java and Selenium. Solid foundation in automated regression testing, API validation, and database testing within Agile teams, with growing exposure to automation best practices and a strong focus on delivering reliable, high-quality software.

## TECHNICAL SKILLS

**Languages:** Java

**Frameworks:** Selenium WebDriver, TestNG, JUnit

**Databases:** MySQL

**Tools:** Postman, Git, JIRA

## PROFESSIONAL EXPERIENCE

### QA Automation Engineer

2023-02 - present

QualityEdge Solutions

Developed and maintained automated test scripts for web applications using Java and Selenium WebDriver, improving regression test coverage by 40%. Performed API testing using Postman and executed database validations with SQL and MySQL. Actively participated in Agile Scrum ceremonies and collaborated with developers to identify, report, and verify defects using JIRA.

Technologies: Java, Selenium WebDriver, TestNG, JUnit, Postman, SQL, MySQL, Git, JIRA

## PROJECTS

### Web Automation Regression Suite (personal)

5 months · [GitHub](#)

Created a basic Selenium-based regression automation suite for a demo web application, covering core user journeys such as authentication, form submissions, and data validation. Achieved approximately 70% automation coverage of critical paths.

Technologies: Java, Selenium WebDriver, TestNG, Git, MySQL

## EDUCATION

### Bachelors in Computer Science

Macquarie University, 2022 | GPA: 3.5

## CERTIFICATIONS

ISTQB Certified Tester -  
Foundation Level
